Greater Noida, Uttar Pradesh - 201310

OBJECTIVE

Third-year Computer Science student with a strong foundation in programming and passion for web app development. Skilled in building responsive applications using modern frameworks and eager to apply technical knowledge in real-world projects through an internship.

EXPERIENCE

EntroGroup & Company

Flutter Developer

Sept 2025 – Oct 2025

Remote

- Developed a Random Story Generator using frontend technologies.
- Designed Figma UI for company landing page and implemented it in Flutter.
- Collaborated in a team to build app UI and core functionality.

EDUCATION

Noida Institute of Engineering & Technology

Bachelor of Technology

July 2024 – July 2028

Greater Noida, India

- CGPA: 9.00/10 (2nd Year)

S.B.S.S College

Intermediate Education

June 2023

Begusarai, India

- Grade: 82%

St. Jude's Vidyalaya

Secondary Education

June 2021

Barauni, India

- Grade: 82%

PROJECTS

Mukesh Electronics Inventory & Sales Management System

Tools: [Next.js, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT]

Jul 2026

[[G](#)] [[D](#)]

- Developed a full-stack Inventory & Sales Management System using Next.js, React.js, Node.js, Express.js, and MongoDB for efficient inventory and sales management.
- Implemented secure JWT-based authentication with role-based access (Admin and Staff) and built RESTful APIs for seamless frontend-backend communication.
- Developed 7+ core modules including Product, Category, Supplier, Customer, Billing, Sales, and Inventory Management with complete CRUD functionality.
- Designed an interactive dashboard featuring inventory statistics, low-stock alerts, sales reports, search functionality, and automatic stock updates after every sale.

FinClassify – Fintech Expense Classification and Reporting Tool

Tools: [React, Node.js, JavaScript, PostgreSQL, SQLite, Recharts]

Sep 2026

[[G](#)] [[D](#)]

- Built a privacy-first, rule-based expense classification system for Indian banking statements without third-party AI/LLM calls.
- Developed a 3-tier categorization engine using learned merchant mappings, keyword matching, fuzzy matching, and heuristic fallback rules.
- Added multi-bank CSV parsing for HDFC, SBI, ICICI, Axis, and generic formats with SHA-256 duplicate detection.
- Created an interactive dashboard with KPIs, doughnut charts, monthly cash-flow trends, and searchable transaction management.
- Implemented PDF and CSV report exports with PostgreSQL support and SQLite fallback.

SKILLS

- Programming Languages:** C/C++, Python, JavaScript
- Web Technologies:** HTML, CSS, Node.js, Express.js, Next.js, React.js
- Database Systems:** SQL, MongoDB
- DevOps & Version Control:** GitHub, GitLab
- Other Tools & Technologies:** Data Structures and Algorithms, Operating Systems, OOPS, Problem Solving

ACHIEVEMENT

- Solved 800+ problems on LeetCode and GeeksforGeeks.
- HackerRank 3* in Problem Solving.
- LeetCode Rating: 1497 | CodeChef DSA Rating: 1509.
- Secured Rank 3742 in IICPC CodeFest 2026 Global Prelims among 13,000+ participants.
